

Range Rules For The Victoria Skeet and Trap Club

1. *The 1st thing to do* upon **ARRIVING** at the club (**BEFORE** even opening up the houses) is to **SIGN IN** yourself and any guests that are with you, so that others coming out to shoot will know who members are and who are guests of the club. You should **FINISH** filling out the logbook as you are paying for your rounds (and your guests are paying for their rounds). If a member is using tickets for payment of rounds, you don't need to use an envelope, but the club needs your complete (legible) name and date on each ticket. **Guest (or members) paying for their rounds with CASH (or check), should use the envelopes with your name, the rounds shot, the amount included in the envelope with the date on the outside of the envelope.** This will greatly help with the accounting of the targets and the money/tickets.
2. **Members** can pay for their rounds with either tickets or cash. 1 ticket (for every 25 targets) or \$6.00 cash (for every 25 targets). **Guests'** rounds are **\$8.00 each** (for every 25 targets) and **must be paid for in cash or check. Members are Not to use their tickets for paying for their guests rounds.** Ticket books for 10 rounds of shooting are available from various members or officers for \$40.00 each, making this the most cost-effective way to shoot.
3. Remember to always **RELEASE** the target-throwing arm on all machines when you are finished shooting and to **RELOAD** the machines. Don't leave it up to the next group shooting to have to load the machines. We need **everyone's** help with this.
4. **Pick Up** your **TRASH** and **HULLS** after any function (or Practice) at the range. Treat this club as you would your own home. If you make a mess, **CLEAN IT UP!**
5. Remember, this is a clay target shooting range and **NOT** a practice hunting range, so we ask that everyone limit their shot size to nothing larger than #7 ½ and shot charges **no larger** than 1 ¼ ounces. Also shotguns should only be discharged in the direction that the fields are laid out and that there is **NO** shooting of any objects other than clay targets at anytime.
6. Also, for persons shooting automatics and pump shotguns that have the capacity to hold more than 2 shells, **NEVER** load more than **2** shells while shooting **Skeet** or **Country Doubles**, or more than **1** shell at a time while shooting **Trap**. Loading more shells than this violates club policy.
7. All new members to the Victoria Skeet and Trap Club need to go through a short safety and machine operation orientation. **Being Safe means NO Mistakes.**
8. There is to be **NO alcohol consumption** until AFTER you have finished shooting for the day. Shotguns and alcohol don't mix. **If you must drink, you can NOT shoot.**
